

Duke Orthopaedics: Upper Extremity Division

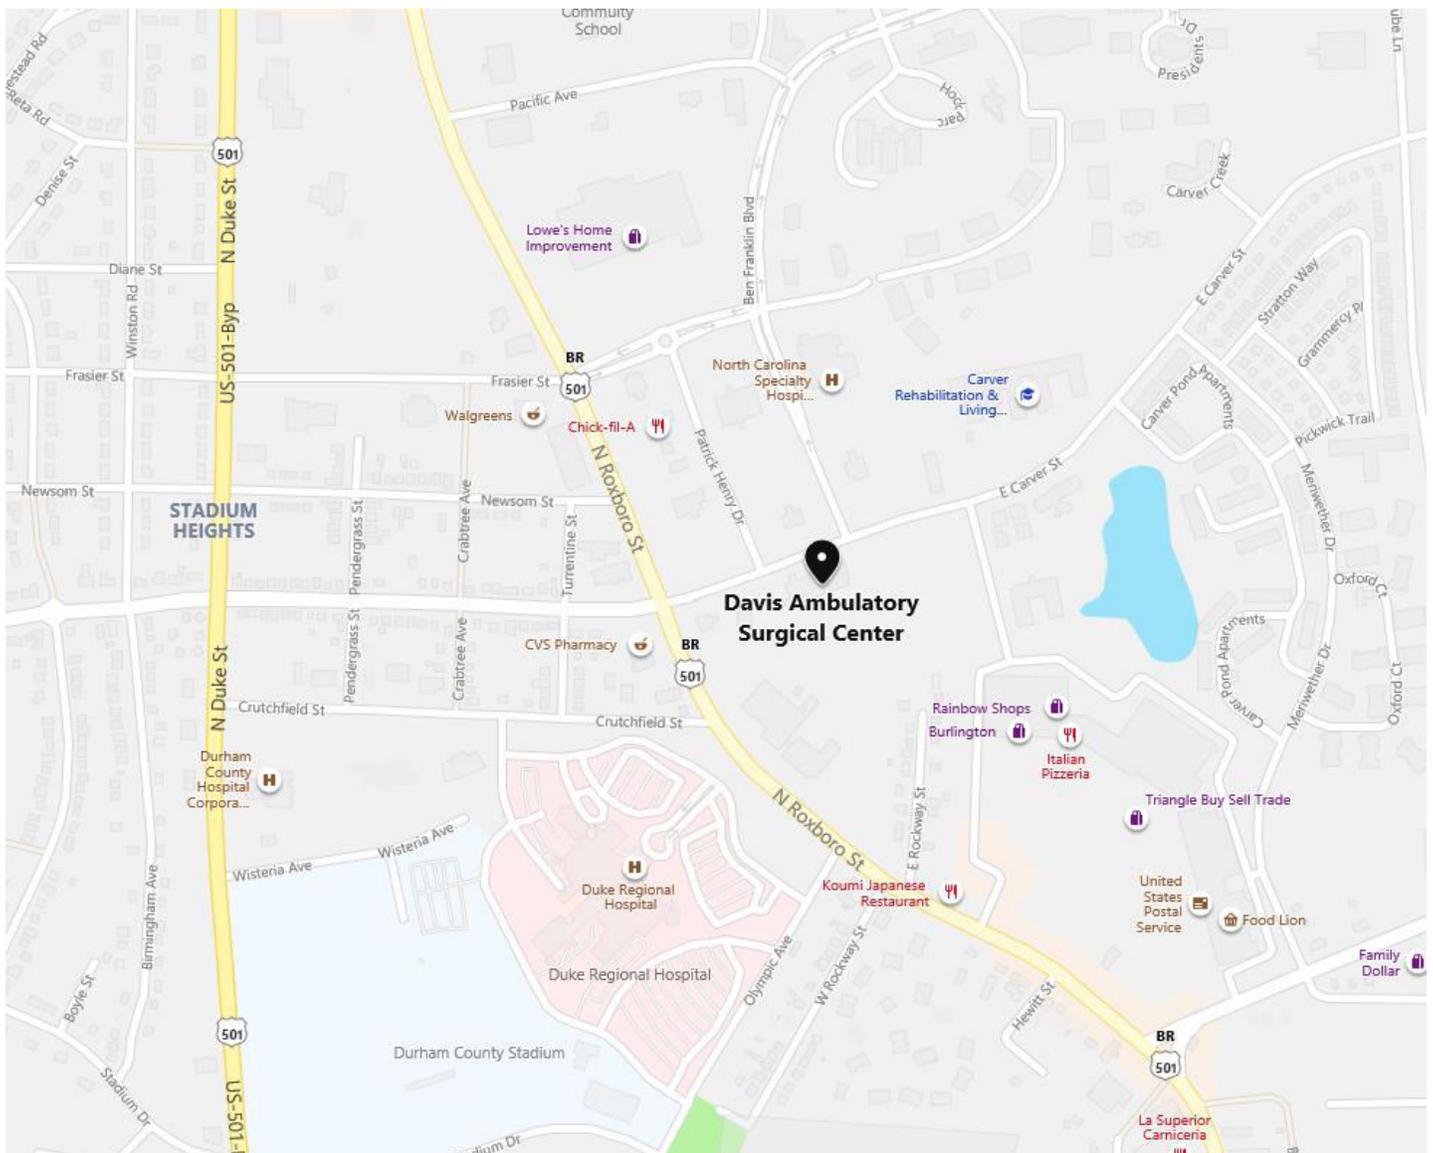

Christopher Klifto, MD & Katherine Batten, PA-C

3609 SW Durham Dr, Durham, NC 27707

Davis Ambulatory Surgery Center

120 E. Carver St
Durham, NC 27704
919-470-1000

Davis Ambulatory Surgical Center is conveniently located on East Carver Street in Durham, across the street from Duke Regional Hospital. Our facility features eight operating rooms, along with a five-bed recovery care center for patients who may require an overnight stay. There is a spacious waiting area with vending for family members and friends.

3609 SW Durham Dr, Durham, NC 27707

You will enter the main entrance (pictured above) and check in at the desks to your right as you enter the building (pictured below)

After you are registered, you will be taken to the preoperative area where you will change into a gown, get an IV placed, and get prepared for surgery. Your family member will be able to accompany you during the preoperative process. When you are taken to the operation room, your family member will be asked to go to the waiting room (pictured above).

After surgery, you will be taken to the recovery area and your family member will be able to see you after the recovery team gets you settled. You are usually in the recovery area for approximately 30 minutes following surgery but this varies with each person and each procedure.
